Introduction

KYRIAKIDIS A. S.A. Knitted Textile Industry was established in 1978 with headquarters in Thessaloniki. Its main activity is the production and trade of knitted textiles and clothing from circular knitting machines.

Our long-lasting and ceaseless course in the branch of garments and the high professionalism that characterizes us, and seated us one from the most reliable companies of branch in Greece.

The production facilities, all situated in the wider area of Thessaloniki, consist of the following:

- **Clothing Industry** in Evosmos of Thessaloniki, and
- **Knitting Industry** in the area of Melissochori.

KYRIAKIDIS A. S.A. Knitted Textile Industry was extended in 1993 in the branch of cotton yarn production, with the foundation of the company named **NORTHERN GREECE SPINNING MILLS S.A.**

NORTHERN GREECE SPINNING MILLS S.A. is located in the area of Melissochori, with its headquarters.

In 2006, all departments stopped production.

In 2011, the company has decided to enter Voluntary Liquidation.

- There are many spare parts, needles, sewing threads, etc. in this deal.

Textile Printing & Flocking Machines

Machine	Description	Model	Quantity
MAAG & SCHENK			
Textile Printing Carousel	Colors: 6, Frames: 8, Automatic, Multi color	VARIprint	1
Cabinet Dryer	Variety of uses. Molded parts or other material blanks can be dried.	TRH (TRUS)	1
Total Machines			2

- Flock is particularly well-suited for use on jerseys, T-shirts, work clothing and other textiles. The velvety surface has a high covering capacity even on dark fabrics, is very durable and retains its color brilliance even after frequent washing.

For motif flocking of T-shirts and sportswear, the adhesive is applied with the screen printing method. For smaller lots, textile flocking is very economical when applied with hand flocking units, and for medium-volume production with semi-automated devices.

This standard cabinet dryer is suitable for a variety of uses. In addition to drying textiles, molded parts or other material blanks can be dried.

- Textile dryer/fixing oven TRH**
 - with mobile carts
 - electrically powered oven, horizontal air conduct for absolute constant temperature
 - adjustable temperature up to 160° C
 - automatic timer
 - adjustable fan for fresh air input and exhaust

Spreading Machine For Tubular Fabrics

Make	Type	Fabric width	Table dimensions
Kronos	Tubular	130cm	145cm x 14.64m

Spreading Machine For Open-width Fabrics

Make	Type	Fabric width	Table dimensions
Kronos	Open-width	235cm	250cm x 14.64m

Inspection Machine for Circular Knitwear

Make	Model	Fabric width	Spare luminaries
AB Calator	AS1001	90cm	More than 5

For tube fabrics with widths up to 90cm. The machine inspects circular knitted fabrics. There is a meter counter, a mirror for double-sided inspection, ascending batch winder, and more than 5 spare plastic luminaries.
